DISRUPTIVE DEVELOPMENTS IN BIOMEDICAL APPLICATIONS

Edited by
Swati V. Shinde, Parikshit N. Mahalle, Varsha Bendre
and Oscar Castillo

record keeping through electronic health records (EHRs).

- Presents state-of-the-art research in the field of biomedical engineering using various physiological signals.

Chapter 11: Evolution of Automatic Epilepsy Detection and Classification Techniques: A Survey

Neeta Hemant Chapatwala and Dr. Chirag N. Paunwala

Chapter 12: Evaluation of Boosting Algorithms for P300 Detection in EEG Signals

Subhash Tatala, Dr. Priyanka Jain, Dr. Nivedita Bhirud, Rutuja Pote, Vinaya Kumar, Purvi Sampat and N.K. Jain

Chapter 13: Comprehensive Study of Brain Computer Interface (BCI) with emphasis on Signal Processing Strategies

Dr. Vrushali Ganesh Raut, Dr. Pranoti P. Mane and Dr. S. O. Rajankar

Chapter 14: Fetal Electrocardiogram Extraction using Adaptive Filters Approach

Dr. Manjiri A. Ranjanikar, Dr. Sagar V. Joshi, Dr. Jaishri M. Waghmare, Dr. Swati Shinde and Dr. Rachana Y. Patil

Chapter 15: Detection of Heart Functioning Abnormalities (Arrhythmia) Using ECG Signals : A Systematic Review

Ketan Sanjay Desale and Dr. Swati Shinde

Chapter 16: Heart Rate Variability Analysis in Healthy Male Subjects with Comprehensive Age Groups

Anjali C. Birajdar and Dr. Vijaya R. Thool

Chapter 17: Electronic Health Records: Need, Challenges and Future scope

Dr. Priya Makarand Shelke and Dr. Jayashri Vitthalrao Bagade

Chapter 18: Role of EHR in cancer detection: need, challenges and future scope of EHR

Pratiksha R Deshmukh and Rashmi Phalnikar

Chapter 19: Implantable Pacemaker Low Power Telemetry Unit

Santosh D. Chede

Chapter 20: Recent Advances in Drug Delivery Systems: MEMS Perspective

Bhavana H T, Dr. M. Anantha Sunil, Sanjana T and B Harshitha

Chapter 21: Estimating the Blood-vessel Response to Vaso-active Agents by Microscope Video Image Processing

14.1 INTRODUCTION

Congenital heart abnormalities are one of the primary birth defects and the main reason for death from birth defects. The shape of cardiac electrical signals shows up in almost all cardiac abnormalities. The non-invasive analysis of fetal cardiac signals can be a useful tool for monitoring the unborn heart's health. This could be used to detect heart problems early on. The electrical potential created in connection with heart action is represented graphically by the ECG signal. It is one of the primary used physiological signals in medical backgrounds. A FECG signal can be used to determine the well-being and status of the fetus, much as it can be done in adults. Fetal electrocardiography, Doppler ultrasound, and fetal magnetocardiography are non-invasive fetal monitoring procedures. Doppler ultrasound is the most often utilized approach since it is inexpensive and easy to use. However, because this approach generates an averaged heart rate, it cannot provide beat-to-beat variability.

The advantage of a fetal ECG is that it can detect beat-to-beat variability. There are numerous procedural issues with non-invasive FECG extraction. Different forms of interference, such as maternal electrogram (MEMG), maternal electrocardiogram (MECG), baseline drift, and power line interference of 50 Hz contaminate the FECG signal. The extraction of FECG is stimulating because of the low amplitude of the signals, various forms of noise, and overlapping frequencies of the mother and FECG. The basic goals of electronic fetal monitoring are to abstract and examine the FECG signal. Digital signal processing methods were used extensively in the extraction of the neonatal ECG signal. The abdominal ECG signal (AECG) is thought to be a nonlinear mixture of the MECG, FECG signal, and numerous interference signals. The FECG is derived from two signals collected on the mother's skin in the thoracic and abdominal regions. The thoracic electrocardiogram (TECG) is thought to be nearly entirely maternal, but the abdominal electrocardiogram

Greetings!" book Titled " "Predictive Data Modeling for Biomedical Data and Ima

Poonam Tanwar -pdmdbi.2023@gmail.com>

to Poonam: Dr.Poonam, bcc: me

Dear Author's

Greetings of the day!

Thank you all for your contribution as a chapter in the book "Predictive Data Modeling for Biomedical Data and Imaging" by river publis

I am happy to share that , We have submitted all the chapters to the publisher today.

I'll get back to you whenever we have a query/ revision required from the publisher side.

Table of content for your reference is also attached for further use.

Thank you so much everyone once again.
