TO WHOMSOEVER IT MAY CONCERN

This certifies that the institute has facilities of Solar energy, a Bio gas plant, Sensor-based energy conservation and the usage of LED lights and other power-efficient equipment for energy-saving techniques and alternative energy sources.

We thus certify that the example geotagged images and bills show the energy-saving alternate source facilities for the 7.1.2

ALTERNATE SOURCES OF ENERGY AND ENERGY CONSERVATION MEASURES

Traditional sources of energy like fossil fuels release harmful pollutants such as carbon dioxide, sulfur dioxide, and nitrogen oxides when burned, contributing to air pollution, acid rain, and climate change. Alternative sources like solar energy produce no greenhouse gas emissions, making them much cleaner options. The sun provides an immense amount of energy every day that can be harnessed through solar panels.

The college solar power plant is a renewable energy system comprising solar panels installed on workshop rooftops of capacity 25kW. It harnesses sunlight to generate electricity, providing a sustainable and environmentally friendly energy source for college facilities. This initiative promotes clean energy adoption, reduces carbon emissions, and supports educational efforts on renewable technologies.

Nutan Maharashtra Institute of Engineering & Technology implements a biogas plant, converting organic waste into renewable energy, fostering sustainability and reducing environmental impact.

Institute has replaced incandescent bulbs with energy-efficient LED lights which has significantly reduced lighting energy consumption while maintaining adequate illumination levels. The institute also has energy-efficient appliances such as air conditioners, water coolers and Lift leading to substantial energy savings. Occupancy sensors are allowing for better control and optimization of lighting systems based on occupancy patterns and usage requirements.

TO WHOMSOEVER IT MAY CONCERN

This is to certify that the following facilities are available in the institution for the degradable and non-degradable waste management pertaining to metric 7.1.2.

1. Solid waste management
2. Liquid waste management
3. Biomedical waste management
4. E-waste management
5. Waste recycling system
6. Hazardous chemicals and radioactive waste management

We hereby declare that sample geotagged photographs and documents enclosed indicates the measures taken by the institution for solid waste management, Liquid waste management, Biomedical waste management, E-waste management, Waste recycling system, Hazardous chemicals and radioactive waste management for your kind reference.

- Solid waste management: -
- Liquid waste management
- Biomedical waste management
- E-waste management
- Waste recycling system
- Hazardous chemicals and radioactive waste management

1. Solid waste management: -

Academic buildings and their surrounding areas get routine cleaning, and garbage is sorted and disposed of appropriately. Internal correspondence uses printed paper with one side.

2. Liquid waste management: - To prevent stagnation, liquid waste from the points of generation, such as the restroom and canteen, is released as effluent into an appropriate drainage system. The plants are irrigated with wastewater collected from the hostel, drinking water left from water coolers, and wash basins.

3. Biomedical waste management: - The health care center has an efficient biomedical waste management system in place. Biomedical waste is properly collected and sent to a municipal waste collection system.

4. E-waste management

The majority of e-waste, including written-off instruments and equipment, outdated computers, printers, electronic devices, and circuits, kits, condemned computer lab supplies and devices, Electronics, batteries, CDs, fluorescent lights, PCBs, and other miscellaneous e-waste are all gathered and Major repairs are handled by professionals with the assistance of the lab technician, who handles minor repairs with the help of staff members. The institution has the MoU and it is disposed to the respective company as per requirement.

5. Waste recycling system: The campus generates waste, and efforts have been made to recycle and reuse it.

7. Handling Hazardous Chemicals: To safeguard public health, and the environment, and ensure safety, hazardous chemicals are stored in a store room designated in the chemistry lab.

NOW IT IS AGREED BY AND BETWEEN THE PARTIES HERE TO AS FOLLOWS:

1. BENEFITS:

a) For Hospital:

1. Attharva Accident Hospital is a Multispecialty hospital, with a minimum of 120 beds for General Medicine Department.
2. Hospital will not provide credit facility without this letter. In emergency, the patient should be treated as per the hospital norms. However, the request letter will be submitted latest by next working day.
3. Hospital shall provide cashless facility to the staff and their families (as defined under NMIET rules) only for IPD operations.
4. This facility will not be available to the students except under emergency situations.
5. Reimbursement to the staff will be as per NMIET Medical policy.
6. Hospital will not provide cashless facility for Medicine, CT Scan, Nuclear Medicine and M.R.I. The patient will claim for the same from NMIET after discharge.
7. After the beneficiary is discharged from the Hospital, Hospital shall submit the bill along with supporting documents to NMIET for reimbursement.
8. Hospital shall furnish to NMIET the Detailed Schedule of Charges for various services and will keep informed about any revision in the charges, which may take place from time to time.

b) For Institute:

1. NMIET will not be responsible for making payments for items such as special attendant charges, telephone, snacks, food and beverages etc. and must be directly collected from the beneficiary.
2. Payments in respect of the Final Bills shall be made by NMIET directly to Hospital within a period of 25 days from the date of receipt of the Final Bill.
3. The NMIET beneficiary will be provided best possible treatment by the panel of consultants attached to Hospital according to the practice parameters and clinical protocols established by SDMH.

2. COST:

Parties acknowledge and agree to bear their own costs associated with the obligations set forth in this MoU. No hidden cost to any party.

3. NO LEGAL OBLIGATIONS:

The parties agree that provisions contained in this MoU do not create any legal obligations between the Parties, save for the confidentially provisions in this MoU.

In light of the pressing global concerns regarding water scarcity and sustainability, it is imperative for us, as engineering institution, to explore and advocate for innovative solutions. One such solution that warrants our attention is Rainwater Harvesting—a technique that not only addresses water scarcity but also promotes sustainable water management practices.

Key Components of Rainwater Harvesting Systems:

1. Catchment Surface: Rainwater is collected at rooftops.
2. Pipes: These are used to channel rainwater from the catchment surface to trees

This is to certify that green campus initiatives are taken to promote environmental sustainability, reduce carbon footprints and create eco-friendly learning and living environments within educational institution. Significant efforts made on campus to create a greener are landscaping with trees and plants, pedestrian friendly pathways, restricted entry for automobiles, usage of bicycles, ban on use of plastics.

We thus certify that the policy documents and sample photos that are enclosed reflect the efforts to support eco-friendly living and learning environments.

Following Green campus initiatives are taken to promote environmental sustainability, reduce carbon footprints, and create eco-friendly learning and living environments within educational institution.

Major green campus initiatives in the NMIET campus are:

- Restricted entry for automobiles
- Usage of bicycles
- Pedestrian-friendly pathways
- Ban on use of plastics
- Landscaping with trees and plants

1. Restricted entry for automobiles

- Separate parking facilities are provided for two wheelers and four wheelers inside the campus.
- Vehicle parking boards are posted at required places.
- Staff members and students coming by two wheelers are instructed to wear helmets to ensure safety.
- Faculty and students of the institute use the transport provided by the management.

2. Usage of bicycles

- Bicycles provide a sustainable and environmentally friendly mode of transportation, emitting zero emissions and reducing the carbon footprint of commuting on campus.
- Bicycles are kept at main gate of college which offer convenience and accessibility, allowing students and faculty to navigate campus quickly and efficiently, especially in areas where cars may be restricted.

3. Pedestrian friendly pathways

- Pedestrian pathways are provided in the campus, these designated areas for walking, separate from vehicular traffic, enhancing safety for students, faculty, staff, and visitors.
- Walking on pedestrian pathways promotes physical activity and exercise among students, faculty, and staff, contributing to improved health and well-being.

4. Ban on use of plastics

- Minimizing plastic usage promotes sustainable practices and responsible consumption habits among students, faculty, staff, and visitors, fostering a culture of environmental stewardship.
- Use of steel water bottles is encouraged in campus.
- The college has banned the use of single-use plastics in college mess.
- Say no to Plastic like posters are pasted on notice boards of all departments.

5. Landscaping with trees and plants

- The college is surrounded by native species of trees.
- Trees and plants absorb carbon dioxide and release oxygen, improving air quality and reducing pollution levels on campus.
- Trees and plants enhance the aesthetic beauty of the campus, adding color, texture, and visual interest to outdoor spaces.

THE INSTITUTION HAS DISABLED-FRIENDLY ENVIRONMENT

1. Introduction

To enable handicapped persons to participate actively in national development initiatives while enjoying lives of dignity and independence, higher education possibilities must be made available to them. An environment that is barrier-free and meets everyone's requirements equally is to be designed. With this as its guiding principle, Nutan Maharashtra Institute of Engineering and Technology has developed a policy relating to the establishment of facilities for people with disabilities to learn, commute freely, use facilities for their own needs, and to monitor these facilities to foster a welcoming environment. To provide barrier-free environment, the following facilities are established and maintained

To provide a barrier-free environment and unique educational methods that will accommodate all categories of disability among the faculty and students, the following amenities are set up and kept up to provide a barrier-friendly environment

FACILITIES FOR DISABLE PEOPLE

Sr. No.	Particulars
1	Built environment with RAMPS
2	Lift for easy access
3	Disabled friendly Washrooms
4	Provision for enquiry and information

The college installed ramps so that individuals with disabilities could easily access departments, laboratories, classrooms, libraries, and restrooms. There are elevators at well-known locations. The

institute makes common areas, such as the canteen and restrooms, accessible by installing ramps where necessary.

In addition to the amenities listed above, wheelchairs are available on college property for convenient mobility. Human support is offered via the Information Centre. To locate the information and direction needed to get to a specific location, signage, and wayfinding are offered. For ease of comprehension, the sign boards are designed with appropriate symbols and contrast colours.
