The architect is a metaphysical priest dealing in basic essentials, who has the courage to face the primal conception of reality. A building is alive, like a man. Its integrity is to follow its own truth, its one single theme, and to serve its own single purpose. A man doesn't borrow pieces of his body. A building doesn't borrow hunks of its soul. Its maker gives it the soul and every wall, window and stairway to express it." In history of civilization, architecture has longest tradition, but tradition is not about imitating previous generation. It is about learning from their experience.
